# Chrome Extensions Analysis Report

This report documents the analysis and review of Google Chrome extensions installed in the browser. The purpose of this activity is to identify potentially unwanted or suspicious extensions, understand their permissions, and remove those that are unnecessary or may pose a security risk.

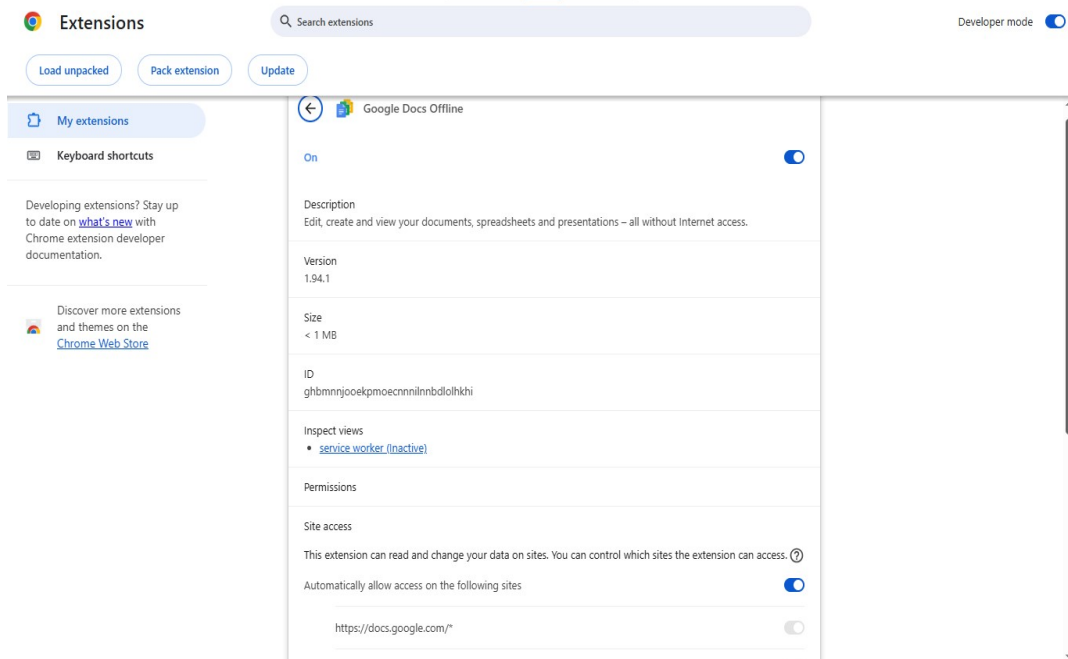

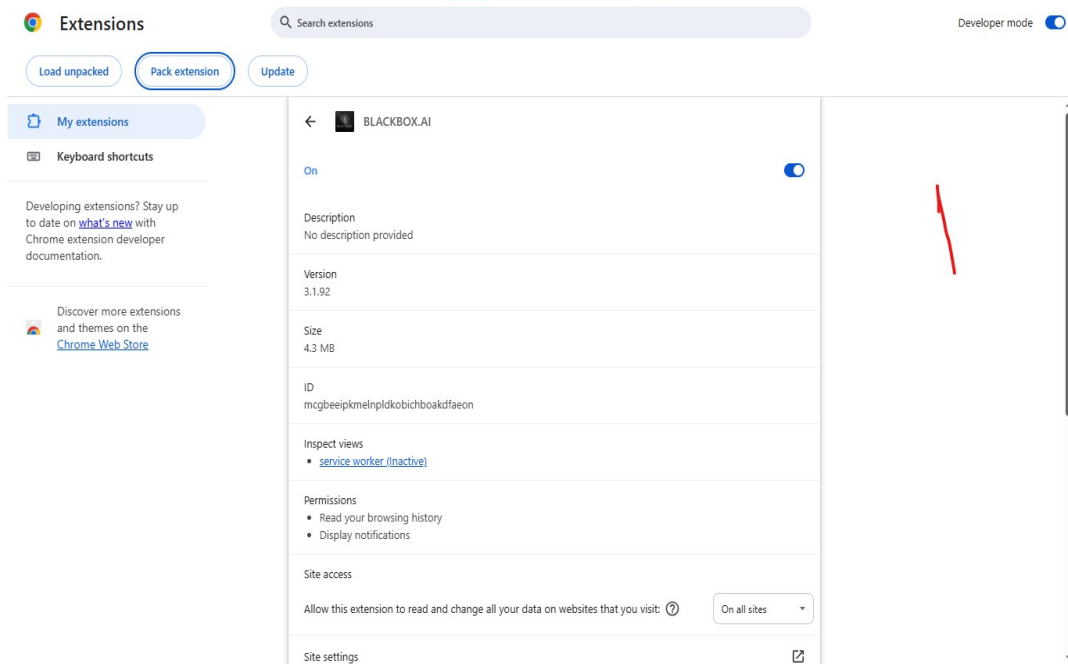

Step 1: Viewing all installed Chrome extensions.

*Step 2: Extensions list after removal of unnecessary extensions.*

*Details of 'Spoke - GMeet Recorder, live AI reports' extension.*

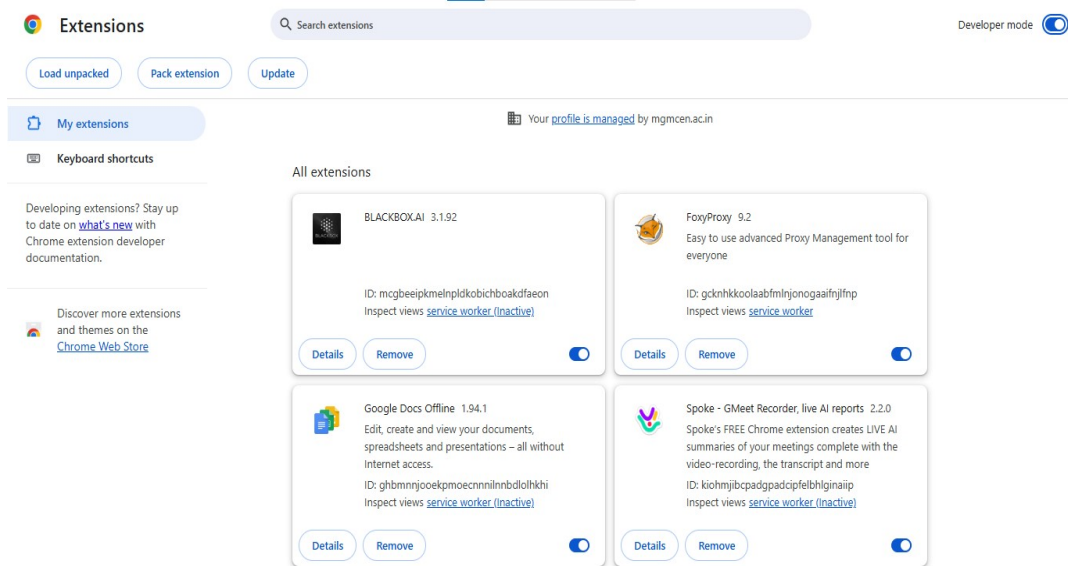

Details of 'Google Docs Offline' extension.

Details of 'BLACKBOX.AI' extension.

Details of 'FoxyProxy' extension.

Chrome extensions list in Developer Mode with details.

Final view of Chrome extensions after review process.

Conclusion:
The review process revealed multiple installed extensions, some of which had broad permissions that could impact browser security. Unnecessary or unused extensions were removed to minimize potential risks. This step is an essential part of maintaining a secure browsing environment and protecting sensitive data.
